

Jerrycan, Type 5, plastic rigid

Overview

Specifications

Item code	4700000056
Unit weight	1kg
Material group	NFI-JCAN

- Standard rectangular shape jerrycan for individual or family water collection and storage. Round shape is also acceptable but occupies more volume to transport.
- Should be supplied in large quantities only when voluminous transport can be made at reasonable cost.
- Some specifications may vary with national standards and local market conditions. For locally sourced items, check the relevant national standards or specifications. Any important variation from the relevant standard needs to be approved by a specialist.

Key Points

- AQL is considered a "live" document. IOM staff users of this AQL document must check SharePoint that they have the latest version.

Description

Jerrycan - Plastic - Rigid - 20L

Capacity	20L
Weight	1kg
Material	Manufactured of food grade. New HDPE plastic blow moulded. Recycled plastic not allowed. Suitability for drinking water (containing no toxic elements) to be certified by approved official body.
Colour	Light colour only (white, yellow), UV treated for long-term outdoor use.
Screw cap	Injection moulded screw cap of 50mm diameter minimum. A 50mm opening is the minimum to ensure a minimum waste of water when filling the jerrycan. A smaller opening is not recommended.
Impact Resistance / Drop Test	Should resist 5 drop tests from 2m high, full of water.
