

Training package on the Progressive Resolution of Displacement Situation

This new training package is designed to support IOM staff to develop a strategic plan based on the IOM Framework: the Progressive Resolution of Displacement Situations.

Training Objectives

On completion of the training, participants will:

- Have a strong understanding of IOM's PRDS Framework
- Be able to apply the PRDS Framework to their country or regional context
- Have drafted a strategic plan which considers the mobility dimensions of crisis and the progressive resolution of displacement situations
- Have strengthened relationships with key partners

The 2½ day participative and modular training is based on the PRDS Framework. The training employs MCOF strategic planning methodology to support the development of a strategic plan and/or key recommendations.

Conducive environments:

Political, civil, economic, social and cultural rights, including freedom of movement, are up-held, in line with national and international standards and norms.

Self-Reliance: Displaced populations, other migrants and affected communities are economically productive members of society, able to satisfy their own needs, including through mobility strategies.

Resilience:

Displaced populations, other migrants and affected communities are empowered to better prepare for, cope with and avoid crises, embracing mobility and other strategies to move quickly and effectively out of crisis and vulnerability.

Coping Capacities:

Existing coping capacities and strategies strengthened and risks countered.

CRISIS

The PRDS framework

The PRDS Framework outlines IOM's inclusive approach which integrates mobility dimensions to progressively resolve displacement situations and so more effectively assist those affected by human induced and natural disasters.

Central to this approach is recognition of the need for systematic efforts across multiple levels of intervention and wide-ranging partnerships to advance resilience, grounded in long-term, evidence-based development action. The Framework integrates a mobility perspective and recognises the impacts of crisis and displacement on displaced populations, as well as other migrants and affected populations.

The PRDS Framework is intended to guide IOM's approach to the progressive resolution of displacement situations as part of its wider response to migration crises.

Training outline

1. Context analysis
2. Relevant international Frameworks and the PRDS
3. Key principles
4. Partnerships
5. Strategic objectives
6. Monitoring and evaluation

Training methodology

- An integrated approach providing technical inputs with workshop activities to facilitate direct application to the local context
- Participants are encouraged to interact through debate and discussion to share experience, promote common understanding and context-relevant planning
- MCOF strategic planning methodology is employed, embedding the PRDS within MCOF approaches
